

MARKED-UP COPY OF ORIGINAL ABSTRACT OF THE DISCLOSURE

ABSTRACT OF THE DISCLOSURE

A method of making a computer booting an operation system from a flash card which is plugged in a multi-card reader ~~is disclosed. The multi-card reader does not care the card is located at first socket or not. The method comprises:~~ having the following steps: at first, a bootable card having a master bootable record or reserve sector written a bootable pattern thereon is prepared. Then if the BIOS of the host computer requests a bootable pattern from the USB storage apparatus, the firmware of the multi-card reader is then provided a logic unit number(LUN) =0 to the host computer if there is a bootable flash card seated at a socket. The socket is not need to be the first socket but arbitrary. Thus, the USB card reader will be convenient for any user.

REMARKS

Abstract of the Disclosure

Applicant is submitting a substitute Abstract of the Disclosure for that originally filed with this application to more clearly describe the claimed invention. Entry of the Substitute Abstract of the Disclosure is respectfully requested. Applicant has also enclosed a marked-up version of the originally filed Abstract of the Disclosure as requested in the USPTO Notice dated September 13, 2005.

Summary

In view of the foregoing amendments and remarks, Applicant submits that this application is now in condition for allowance and such action is respectfully requested. Should any points remain in issue, which the Examiner feels could best be resolved by either a personal or a telephone interview, it is urged that Applicant's local attorney be contacted at the exchange listed below.

Respectfully submitted,

Date: October 12, 2005
